Christmas---And This Store is Ready

Those who put thought into their Christmas shopping appreciate the fact that gifts of real, lasting value are those which contribute to the comfort as well as the beauty of one's daily surroundings. Such are the useful holiday gifts displayed now in almost endless variety throughout our entire store. Now where else can there be found such a collection of useful gift articles?

"THE WORRIES OF THE SEASON?"

If this store may play its part during the trying days that lie between now and Christmas eve—if by perfect, unassuming service and superb assortment for your choosing, it may help to keep the puzzle wrinkles from your forehead, it will do all we have hoped and planned to have it do. Gifts of all descriptions are here, delightful, inexpensive ones for those who must closely reckon the incomings and outgoings—superbly rich ones for those who need not count the cost.

We have arranged them conveniently for your inspection—our sales force will find no effort too great, if it helps you in your selection.

FOR CHRISTMAS—IN ALL THE WORD MEANS—THIS STORE IS READY

Our display of Chafing Dishes and Sets, Egg, Sherbet, Bouillon Sets, Crumb Trays, Serving Trays, etc., offers suggestions that cannot be duplicated, in quality and price.

We call your attention to our line of electric attachment dishes.

See those Electric Toasters, a gift that will please and delight the whole household.

Our CUT GLASS Department offers values that will please. Here you will find a large assortment to select from. One of our specials is this Cut Glass 8-inch Bowl at \$3.00.

In choosing a GIFT for your wife, why not a "Duntley" Vacuum Sweeper?

Practical and useful gifts are what we want in the home, as well as to give to our friends. In selecting a Duntley Carpet Sweeper, you will bring happiness to the entire household. Makes house duties easy and a cleaner home. No electric power needed. Use the same as an ordinary carpet sweeper. Costs only \$9.75. If your wife is not pleased with it, we will take it back.

We should like very much to mention every article of merit that would attract your attention and offer lasting value in filling your Christmas list, but space will not allow it. A trip to our store and an inspection of goods displayed will satisfy prudent buyers that we offer only goods of sterling worth and value.

Our name and reputation is your guarantee of high quality and reasonable prices.

TALK OF THE TOWN

The Power of Water.

A sure thing wager sprung on curious visitors by the engineers of some of the big water power projects of the far west is that a 200 pound man, swinging a four pound ax with all his might, cannot make a dent in the water as it emerges from the nozzle at the power house. Burying an ax in a stream of water looks like child's play, and the average 200 pound visitor is likely to bite. He invariably loses. So great is the velocity of the water emerging from the nozzle in these up to date power plants that an ax, no matter how keen an edge it may have, is whirled from the hands of the strenuous axman at the instant of contact with the water. The water travels at a pressure of about 500 pounds to the square inch in many instances, and no power on earth can turn it off at the nozzle once it gains momentum. It has the same effect on one's fingers as a rough emery wheel and will shave a plank with the nicety of a razor edged plane. When, as frequently happens, it is necessary to shut down a power plant operated by one of these streams the nozzle is deflected by means of a powerful set of gears.—Chicago Record-Herald.

Dogs That Resemble Bears.

It has already been noted by scientists that certain mountain dogs have shapes and assume attributes resembling those of a bear. Among these dogs the sheep dog of the Pyrenees bears a closer resemblance to the bear than most others. Although he is seldom over twenty inches high, his bones are very massive and his muscles exceptionally developed. His fur is thick, consisting of long, fine, silky hair, either black, dun colored or gray. His head is large and the nose tapering, the eyes small, but sharp and lustrous and his ears always "attentive." The toes and the base of the feet are elongated and flat. The tail is very short or even entirely missing, and by his manner of climbing the abrupt mountain slopes he may easily be mistaken for a young bear.
