More Mormon Fanaticism.

Right smart Chances out West.

There is clever satire and wholesome truth in the answering letter of the following correspondence, which we find in the last Milwaukee Courier. In our opinion "it needs no ghost" to divine who the member of the Milwaukee bar is, to whose pen the production should be credited. It bears internal evidence of the authorship.

Dear Sir—

Yours, &c. To the P. M., Milwaukee. Dear Sir—Yours of the 25th February, addressed to the Postmaster of this place, was by him duly received, and on account of the multiplicity of business, handed over to me to answer.

Attaining Wealth suddenly—

Among the various means of obtaining sudden wealth in this country, the discovery of a popular "patent" medicine has often proved singularly successful. A letter from New York, published in the Charleston Courier, cites various examples in point. Brandreth, with his pills, has risen from a poor man, to a man of immense fortune. He has now at Sing Sing a story factory for grinding his medicines...

PROTECTION IN CANADA.

Our Canadian neighbors are as great advocates of "protection" as the whigs in the United States. They have "protected" themselves effectually against the cheap grain of the West, which is no small affair, since if they are not able to raise wheat for less than \$1.50 per bushel, they would infallibly be ruined by having it furnished to them at 75 cents. Again: they have four means to "protect" themselves against cheap, safe and expeditious importation of their goods from England—forcing them to make a difficult and dangerous voyage around through the St. Lawrence, which is impracticable about half the year, instead of allowing them the more direct route through our Lake.
