THE GALAXY, PUBLISHED EVERY WEDNESDAY MORNING IN STEWART'S BUILDINGS, BY JUSTUS COBB, BY WHOM ALL ORDERS FOR PRINTING BOOKS, Pamphlets, HANDBILLS, CARDS, Blank, &c. &c. &c.

MISCELLANEOUS.

THE ACORN.

By Elizabeth Oakes Smith. "If there be an interpreter, one among a thousand..."

A TRUE PICTURE.

A young man who formerly lived in New York, and who, by some good fortune or other, during a short residence in Europe, had collected together a large amount of money...

A TRAVELER'S STORY.

The following anecdote is stated by the Sd of Marselles to have occurred a few days ago in the diligence which runs between that place and Toulon...

NEVER FAIL.

The great secret of success in life is never to give up. If we were to leave a legacy for our children, and had nothing better, we should bequeath to them as their motto—"persevere."

The Bandit's Daughter.

A TALE OF THE WHITE MOUNTAINS. BY CLARE W. BRYAN. CHAPTER I.

The New England States are noted for their two ranges of mountains—the Green Mountains extending through the whole length of the State of Vermont and the White Mountains stretching themselves through the northern part of New Hampshire...

There are on this range various caverns of different sizes and shapes, but the mountains around them are so very difficult of ascent, that they have seldom been visited.

Further down the mountain, in a very secluded spot there stands a rude log cabin surrounded with trees and bushes...

He early became enamored of a young lady, whose beauty of person and amiability of manner had won the bitter feelings of his heart, and with all his labors he could not but appreciate her worth and loveliness.

and the society of her whom he had sworn to love and protect became too evident to be misunderstood. She now found that he in whom she had garnered her bosom's best affections, was utterly unworthy of them.

About the time that this association was formed, his wife gave birth to a daughter, which awakened in the mind of his mother a hope that it would be the means of creating in him a desire for home, and a love for the society of virtuous friends...

Early the next morning, "Old Rugg" was his usual custom, arose for the purpose of taking his morning walk, and dressing himself, he took down his broad brimmed hat which always rested on a certain nail on the wall...

It was a death blow to Hitty's hopes. If the child was adopted, she would, in all probability, inherit his property, leaving the large dowry which she had had long in view for herself minus, and she was left with nothing.

She sat a few moments ruminating upon her painful situation—first her anxiety for the welfare of her child, secondly to have the candor of her mind, and then her love for her husband, and the hopes she entertained of his yet being reclaimed, seemed to bear away, and she almost determined to stay with him, and share the disgrace and dishonor which he had already brought upon himself.

home for herself and child. She had but few preparations to make for her departure, and was soon ready when, taking her child in her arms, she knelt by the side of her loved one, and she had often knelt, and offered up a fervent prayer to Almighty God, humbly imploring his protection on herself and lovely infant.

When he made his appearance at "Old Rugg's" the next evening after the downfall of Hitty's hopes, on one of his love visits, he found the blooming and beautiful maiden in a fit of deep melancholy, and tenderly inquired the cause.

It is unnecessary to add that the respectable kid glove young gentleman vanished instantaneously. "New Alb. Dem."

REMARKABLE CASE.—An Irishman employed on the post for the Magnetic Telegraph, which are to be planted through the City, and are now being prepared, on the Jersey side of the river, died on Tuesday, under most extraordinary circumstances.

THE BEST MEDICINE.—Frequent Bathing.—Frequent bathing—not once or twice a month, but every day if you please—in warm or cold water, is the best medicine in the world.

BELL FOUNDARY.—Mr. Andrew Meneely employs 15 to 20 men, and will cast this year upwards of 200 bells, 500 lbs. at 28 cents per lb.—\$56,000. They are made of copper and iron.

heart while in youth, and the shoot that had sprung from this seed had grown with his growth and strengthened with his strength.

When he made his appearance at "Old Rugg's" the next evening after the downfall of Hitty's hopes, on one of his love visits, he found the blooming and beautiful maiden in a fit of deep melancholy, and tenderly inquired the cause.

An Appropriate Reply.—It will be remembered that the President elect, on his way up the Ohio River, stopped a few moments at Jeffersonville, to shake hands with his friends of the "Hoosier" State.

AGRICULTURAL. ADDISON COUNTY AGRICULTURAL SOCIETY. PREMIUMS ON FARMS FOR 1845.

AGRICULTURAL. ADDISON COUNTY AGRICULTURAL SOCIETY.

PREMIUMS ON FARMS FOR 1845. For the best cultivated farm, of not less than Fifty Acres, exclusive of wood-land and waste-land, regard being had to the quantity and quality of produce, the manner and expense of cultivation, and the actual profits:

1. Of how much land does your farm consist; and how much wood, waste, and improved land respectively? 2. What is the nature of your soil and subsoil? Is there limestone in it? What rocks are found in it?

MANURES. 6. How many loads of manure (20 bushels per load) do you usually apply per acre? How do you manage your manure? Is it kept under cover? or are there cellars under your barns or stables for receiving it?

TILLAGE CROPS. 11. How many acres of land do you till? and with what crops do they occupy, and how much for each crop? 12. What is the amount of seed planted or sown for each crop,—the time of sowing,—the mode of cultivating, and of harvesting,—and the product per acre?

DOMESTIC ANIMALS. 21. How many oxen, cows, young cattle, and horses do you keep, and of what breeds are they? 22. Have you made any experiments to show the relative value of different breeds of cattle or other animals for particular purposes, and with what results?

FRUIT. 27. What is the number of your apple trees? Are they of natural or grafted fruit, and chiefly of what varieties? 28. What number and kind of fruit trees, exclusive of apples, have you, and what are among the best of each kind?

FENCE, BUILDINGS, &c. 32. What is the number, size, and general mode of construction of your farm buildings; and their uses? 33. What kind of fences do you construct? What is the amount or length of each kind, and their cost and condition?

affidavit shall be made. J. M. WEEKS, RUFUS WAINWRIGHT, Com. on S. GALE. Form.

THE CROPS. We have advised by letters and papers, from nearly every quarter in the Union, and their general tenor indicates an abundant harvest of summer Grains.—The Wheat harvest in Virginia and Maryland is certainly above an average; so is Penn. New Jersey, where harvesting is now in progress.

GENERAL JACKSON'S LAST WILL AND TESTAMENT. "The last will and testament of the old hero was this day approved in our county court, and is of public record. He commences by giving his body to the dust, whence it came, his soul to God that gave it, &c., devoting his estate first to the payment of two debts, viz: one of 6,000, with interests, borrowed of Phineas, of New Orleans, another of \$10,000 with interest, borrowed of Blair and Rives, and the balance to his son Andrew Jackson, jr., with the exception of a few servants to his grandchildren."

While the city of New York and its appendages flourish in visible examples, agriculture from active efforts, we promote Presidential and gubernatorial elections, I am proud to look to my native State for a contrary example of the benefits resulting from its legislature forgetting their positions as partisans, and acting for the public good.
