IMPORTANT

Information Collected By the Telegram's "HOW" MAN. Useful Facts Worth Remembering.

Cut Them Out And Preserve For Future Reference.

HOW TO CLEAN FURS.

Helpful Hints on the Renovation of Last Year's Furs.

Ermine and seal skin are best cleaned with soft flannel. Rub the fur delicately against the grain, and when it has been thoroughly lifted and reversed, so to speak, dip the flannel into common flour and rub lightly any spots that look dark or dirty. Shake the fur well and rub with a clean, dry flannel until the flour is all removed.

Sable, chinchilla, squirrel and monkey skin may be very nicely cleaned with hot bran. Get a small quantity of bran meal and heat it in the oven until it is quite warm. Rub stiffly into the fur and leave for a few minutes before shaking to free it from the bran.

Mink may be cleaned and freshened with warm cornmeal, and like the other short haired furs, may be done without removing the lining. But the long haired furs are best ripped apart and freed from stuffing and lining.

Those who may not care to go to the trouble of taking fur garments apart will find that the simple remedies described will go a long way toward making the jackets and capes look clean, even if not ripped apart.

How to Tell the Course of Air When the Wind is Still.

Set a basin of water outside and throw a red hot coal into it, noticing which way the smoke moves. This resembles the one method used by sailors, who throw a live coal into the sea. If too rough they wet a finger and hold it in the air, noting which part cools first.

How to Make a Fertility Album.

This is a gift for only an intimate friend, and for it a small blank book, as nice as you please, but with limp binding, is procured. Poems, quotations and sentiments that you know are favorites of the recipient are written on different pages, each being for a special date in the year. Fold the leaves over and mark, "Open on your birthday," "For Christmas," "For your wedding anniversary," according to what is written on each leaf. Some may be inscribed, "For a troubled day," or, "When your mind is merry." If you have a plain blank book, you can easily replace the cover by one of velvet, plush or vellum.

How to Wash Red Flannel.

Mix a handful of flour in a quart of cold water and boil ten minutes. Add this to warm water and wash the flannel gently with a rinsing motion. Rinse in three or four warm waters.

How to Make a Worsted Ball for a Child.

Prepare two round cardboard 2 1/2 inches in diameter, with small holes in their centers. Wind the cards, laid together, with gay worsteds, passing them around the edge of the cards and through the center hole. Continue until the hole is completely filled and the worsted is thick on the cards, winding loosely at the start, but tighter as you proceed. Cut the wool, slipping one point of the scissors between the cards and guided by their edge. Slip a string between and tie it tightly to hold the wool. Cut the cards off and trim the ball until round.

How to Prevent Cramp.

Cramp can be prevented by holding rolled brimstone in the hand. The legs should be rubbed with sweet oil twice a week.

How to Reduce Hip Measure.

Get up on a box or anything that will raise you a few inches from the floor. Stand firmly on one foot, place the hands on the hips, stiffen the knee of the other leg and swing the leg from the hip backward and forward without bending at the waist. Reverse the movement every few minutes and if possible continue the exercise an hour each day for two months, and there will be a decided difference in your hip measure.

How to Make Windows Like Ground Glass.

Brush the glass with a hot solution of sal ammoniac. It will evaporate instantly, leaving a beautiful radiated deposit.

How to Make a Good Salve.

A good salve for burns, scalds, cuts, etc., can be made as follows: Take equal parts of yellow dock and dandelion roots, add a good proportion of cedar and a good proportion of the juices by steeping and pressing, strain carefully and simmer the liquid with sweet cream, fresh butter and nutmeg tallow. Simmer together until no appearance of the liquid remains; before it is quite cold put it in boxes.

How to Bleach Yellow Linen.

Linens made yellow by careless washing can be restored by working it well in solution to which has been added a clear solution of chloride of lime. Rinse before and after.

How to Clean Japanned Goods.

Hot water will cause scaling; therefore sponge the articles with white soap and lukewarm water, then wash clean. Wipe dry, sprinkle flour over them and rub with a soft, dry cloth, finishing with a silk handkerchief. Rub white spots caused by heat with a flannel dipped in sweet oil and then spirits of wine. Such spots, however, are hard to remove.

How to Shell Beans Easily.

Pour scalding water over the pods, after which the beans will slip out readily. Apple skins may be removed in this way.

How to Restore Crapes.

Water leaves white spots on crapes. To restore it lay the spotted places over old black silk, fastening the crapes smoothly down. Apply ink with a camel's

hair brush, wiping any surplus of it off with a bit of the silk. The ink dries at once, restoring the black to the crapes.

How to Prevent a Deposit in Teakettles.

An oyster shell kept in the kettle will attract all stray particles to itself.

How to Test Glycerin.

Glycerin is pure if it emits no odor when rubbed on the hands.

HOW TO SKATE FAST.

An Expert Gives Some Interesting and Reasonable Information.

Joseph F. Donohue, who is recognized as the champion amateur skater of the world, in giving instructions to his friends, tells them to first learn to stand perfectly even on their skates, so that the edges of the blades will not cut the ice. To gain headway at first balance on the left foot, give a slight sidelong push with the right and swing the body forward. Then bring the right foot close to the left, change the balance of the body to the right foot and push with the left.

After gaining headway lean well forward and clasp the hands behind the back, letting the arms hang loosely. This prevents the swinging and working with the arms, which should not be done except when a sharp turn is to be made. For speed keep up nearly in a straight line as possible for obvious reasons. A little practice in this will make it easy. Breathing should be done together through the nostrils, the mouth being shut closely. If the skater after trying to do this, finds it really impossible, as it is for some people, a pad should be worn over the mouth. An elastic cord will hold it in place.

It is interesting to know in these days when patents on skates are so numerous, that Mr. Donohue thinks the best skate is a blade eighteen inches long set in a wooden foot rest, fastened in the heel by a screw and by straps at the toe and heel.

How to Exterminate Moths.

It is claimed that whole cloves are better than cedar chips, camphor or tobacco as a protection against the ravenous moth.

How to Lessen Wrinkles.

Those having a flabby skin are troubled most with wrinkles. Years ago the ladies of England used a substance called "wool fat," which they obtained by getting the clippings of sheeps wool and steeping it in alcohol. It can be prepared at home or found at the drug gists. A very good pomade for the same purpose may be made from the following recipe. One ounce of wool fat, one ounce of olive oil, one ounce of spermaceti, one ounce of white wax, one-fourth of an ounce of camphor gum. Put the camphor gum into the oil and let it stand one hour, then add the spermaceti and wax. Put all in a dish and set it in a pan of hot water over the fire. When dissolved stir until smooth, take from the fire and stir again until cold. Apply this every night before retiring, washing it off next morning with warm water.

How Some Landresses Wash Gingham.

Instead of using soap in washing bright colored prints or gingham the water is thickened with flour starch. Flour is cleansing and it here does the work of soap without fading the bright colors.

How to Make Gravel and Tar Walks.

This must be done on a dry day, in a perfectly dry place mix two parts of fine rubbish and one of tar. Pass both sifted fine, leaving a hole in the middle of the heap. Into this pour boiling hot coal tar until the mixture is as stiff as mortar. Put three inches deep where the walk is to be and sprinkle with coarse sand. Of course the ground must be rolled smooth first. When the walk is cooled roll it lightly. In a few days the walk will be ready to use solid and waterproof.

How to Make Boiled Peas Look Green.

Put your shelled peas into a bag and before boiling them wash a handful or two of the freshest shells, and let them boil in the water intended for the peas. After the water is somewhat green put in your salt and your bag of peas without removing the pea shells.

How to Cure Offensive Breath.

It should be the first care of every one to see that his teeth are in perfect order and thoroughly cleansed morning and evening. Let him then look to his digestion, and if in both those quarters all is well then the following mixture must be taken and the trouble will be removed. One ounce of liquor of potassa, one ounce of cologne of soda, one and a half ounces of phosphate of soda and three ounces of water. Mix well together and take a tea-spoonful after each meal.

HOW TO REDUCE FAT.

Obesity May Be Cured by a Rigorous Diet.

The real mode of life and diet should be changed if the fat would be reduced. If necessary procure a pair of scales and weigh the different foods that are taken into the system. Reduce the diet then to about four ounces of starch or sugar material per day, one and a half ounces of fat taken chiefly in the form of butter, and about six or seven ounces of albuminous food, such as lean meat or fish. This is the minimum that should be resorted to, and the patient can take more of each at first, and reduce the diet gradually to this point. The proportion of the different food compounds, however, with the exception of figs, dates, grapes and nuts, should also be eaten daily and one-third of a pound of some of the following vegetables. Asparagus, turnips, cucumbers, parsley, water cress, celery, kale or cabbage. Fluids have a fattening tendency, and they must be taken in small quantities. The drinking should be confined to tea, coffee or water and never should be taken at mealtime nor within one hour of a meal. This is pre-emptory, for food will produce fat much quicker and surer when watered by some good beverage.

\$500 Reward!

WE will pay the above reward for any case of Liver Complaint, Dyspepsia, Sick Headache, Indigestion, Constipation or Costiveness we cannot cure with West's Vegetable Liver Pills, when the directions are strictly complied with. They are purely Vegetable, and never fail to give satisfaction. Sugar coated. Large boxes, containing 30 Pills, 25 cents. Beware of counterfeits and imitations. The genuine, manufactured only by the John C. West Company, Chicago, Ill. For sale by Cunningham Bros., druggists, Clarksburg, W. Va.

HOW TO CARE FOR CLOTHES.

Practical Hints to Men on the Preservation of Garments.

When the clothes are removed the coat should be slipped over a bow hanger—the vest may be put on it first.

A coat that is worn quite steadily from day to day ought always to be hung on the back of a chair, the arms being slipped over the back posts, the vest to be hung first in like manner. It is best to place the chair near an open window, as the exposure to air will help to soften the wrinkles.

The trousers should be well shaken, to free them from dust, and then "pulled." This means that they are to be folded down where the front and back creases are, and then, holding them by the top band, the foot is placed on the bottoms on the floor and steady, gentle pressure exerted.

Lay the trousers out smoothly on the bed—still folded on the creases—and fold lengthwise at the knee line, smoothing out all possible wrinkles with the hand.

Put the trousers on the chair seat. In the morning the entire suit will look "rested," and the end will justify the means.

How to Prevent the Rusting of Screws.

Before putting the screws in place dip them in a thin paste made of graphite and oil.

How to Make an "Emergency Case."

Linens "emergency cases" for traveling are made of gray linen, bound with blue, red or black braid, like a small brush and comb case. At one end is a wide pocket divided into three compartments, which hold respectively an envelope of court plaster, a package of antiseptic cotton and a flat card wound with fine linen twine. Above the pocket is a band of inch wide silk elastic the color of the binding, stitched down at intervals to form five foldings for five half ounce flat bottles, with contents labeled below each bottle on the linen—ammonia witch hazel, camphor, glycerin cologne. A loop of elastic cord on one flap attaches itself to a button on the opposite one when they are folded over the bottles while the other ends are also folded and tied as in the usual traveling dressing case.

How to Cure Sweating Feet.

One part of maize meal added to twenty-one parts of powdered alum is said to be an unfailing remedy.

How to Remove Moles.

Moles are a kind of tumor and may be removed, when not too large, if not located on a vein. This is sometimes done by electricity but when the mole is round and like a bead on the flesh, a horsehair tied tightly around its base will soon remove it. Tie it at first as tight as you can stand it, and every day draw the hair tighter. On the third or fourth day the mole will fall off, the hair having gradually cut it through. Some moe thread but there is always a chance of this breaking when tightened.

How to Renovate Oilcloth.

Dissolve 2 1/2 pounds paraffine and one gallon of oil of turpentine in a apply while warm with a sponge or flannel. Let it alone for a day, then polish with a flannel. This completely renews old oilcloth, and is also good for painted floors.

How to Keep Musical Instruments Moist.

Run the wood with pure glycerin occasionally and wipe with a soft cloth.

How to Render Canned Fruit Airtight.

After the usual methods and tests have been resorted to tie a square of cotton wadding over the top of the jar around the rubber, securing it very tightly with twine or white cord. This renders it absolutely airtight.

How to Cure a Felon.

Mix equal parts of strong ammonia and water and hold the finger in it for fifteen minutes. Then tie a cloth wet with the mixture about it and keep it on till dry. A remedy to be used at the beginning of a felon is composed of one ounce Venice turpentine in one-half tea-spoonful of water spread on a cloth and tied on the finger.

How to Clarify Molasses.

Molasses is clarified and made to taste better by heating it and pouring in a pint of sweet milk to every gallon of molasses. Let it boil up, and remove the thick scum from the top.

How to Make Egg-oo.

Beat the yolks of half a dozen fresh eggs with one-quarter pound of powdered sugar. Stir in one-quarter pint each of brandy and Jamaica rum. Add 1 1/2 quarts of milk or cream and one-quarter of a nutmeg grated. Beat the whites to a stiff froth and stir in 1/2 ounces of powdered sugar, and add this to the mixture. Sprinkle powdered cinnamon over the top.

How to Restore Gloss to a Silk Hat.

Clean from dust and apply petrolatum with a silk handkerchief, rubbing with the same until it is dry and glossy.

How to Make Clover Pillows.

Use only the blossoms, and pack them first in slips of strong muslin. Make an outside slip or case of clover blossom cretonne, or embroider on silk or other art cloth delicate pink and white clover blossoms. Use decorative ribbon of both shades found in the pattern.

How to Detect a Leak in a Gas Pipe.

Rub soapy water on the suspected place. A bubble will form over the leak.

How to Keep Milk from Souring.

Add a small quantity of boracic acid to it.

The smallest Pill in the World!

Tutt's Tiny Pills

are very small, yet possess all the virtues of the larger Tutt's Pills which have been so popular for thirty years. Their size and sugar-coating commend them for the use of children and persons with weak stomachs. For Sick Headache they are invaluable as they cause the food to assimilate, nourish the body and pass off naturally without nausea or griping. Both sizes of Tutt's Pills are sold by all druggists. Dose small. Price, 25c. Office, 29 Park Place, N. Y.
