

America, [by] E. V. H.

America

MOST countries have become known the world over for men of letters, art or music [???] America has taken a unique position as the exemplar of a noble statesmanship embracing a new democracy [???] [???] Shakespeare and other universal souls have been repeated in effort and pageantry; [???] Washington has inspired and been the hero to call forth other heroes on the American continents [???] [???] The proud and sturdy story of the United States needs to be kept alive not only for the benefit of those who are already loyal and somewhat conversant with such history, but also to uphold and foster the continued integrity and dignity of the country,
