

## People's intelligence ... citizens of the United States of America

### PEOPLE'S INTELLIGENCE

*Give Light and the People will find their own way .*

—SCRIPPS-HOWARD

Citizens of the United States of America:

*The Surgeon General of the United States Public Health Service is constantly engaged in Research Work, seeking through Medical Science to Save Life, and improve the Health of Citizens of the United States of America .*

*Knowledge gained through Experience, Observation, and Powers of Analysis help in the work .*

*Political Science may be regarded as the Art of helping People to attain their Political aims through knowledge gained from Experience, Observation, and Powers of Analysis, and applied in a Legal manner as prescribed by Law, upon the body Politic .*

*Experience teaches us that the entry of a Third Political Party into the Arena of American Politics generally ends in the defeat of the said Third Party, as well as the fact that the changing of Political Parties in order to accomplish certain Acts, necessarily lengthens the time for the attainment of the said certain Acts, and belittles the fact that the Government of the United States is a Government of Laws, and not a Government of Political Parties .*

*This must not be so construed as to mean that Two Political Parties are not necessary, but must act as a check .*

*Experience teaches us that the Gigantic Massed Power of the Press, opposed to the Administration in Office, attacks the Government during Election Times, violating the Privilege of the Press, and not only disturbs the Domestic Tranquility of the Nation, but in a mistaken idea of what constitutes the Freedom of the Press, Libels and Slanders without restraint .*

*Your Librarian at the Public Library will be glad to let you read a copy of the Freedom of the Press, by George Seldes, Veteran Newspaper Man, who was helped by Fellow Craftsmen, a list of their names appearing in the Book, and thus Evidence is given us from authentic sources as to the Power of the Press, their Organization, and Associations, who are the owners, who are behind them, what are their thoughts,*

*and have they a Social Consciousness, and as we are led by the able Author through the March of Time, we may draw our own conclusions .*

*One conclusion that we may well come to is that of the necessity for a Communications and Intelligence, among the Organizations, and Societies of the People, Citizens of the United States of America .*

*Very Respectfully ,* William C. W. Schwarz, Blackstone Apartments, 81 Ninth Street, San Francisco, California.
